## Speaker

### PhD Francesco Leali

Professor

University of Modena and Reggio Emilia

Francesco Leali is a Design and Methods of Industrial Engineering full Professor at the “Enzo Ferrari” Engineering Department of the University of Modena and Reggio Emilia (IT). He received his M.Sc and Ph.D degree in Mechanical Engineering in 2002 and 2008, respectively. Much of his work has been on improving the integrated design and simulation for the development of new products and processes. He is also expert in designing flexible robotic systems through the use of behavioral simulation and offline programming tools, and through the development and application of methods and techniques of computer vision and adaptive compensation of mechanical systems. Currently Prof. Leali is Advanced Automotive Engineering MSc coordinator (programme jointly offered by Motorvehicle University of Emilia Romagna, association composed by Emilia-Romagna universities and most important automotive companies). Prof. Leali is also project coordinator of MASA – Modena Automotive Smart Area, a newly founded living lab for research and testing of smart mobility and autonomous driving solutions.
